SPIRITUS LOCI

# NEWSLETTER

SEPTEMBER 2021

*Partnership of Places, communities and art forms for an education to beauty.*

# SPIRITUS

# LOCI

## ABOUT

SPIRITUS LOCI is an EU funded project aiming at recovering a physical and spiritual experience of space through art and at fostering the dialogue of memories, lights, shadows and new needs, facilitating the readjustment between the person, the collective and its place

## GOAL

The specific objective is to develop an innovative and creative experiential learning pathway for adults, more or less young, interested in the cultural life of their places, aimed at the realization of a cultural and artistic event in the four pilot sites: Italy, Greece, Germany and Lithuania.

This learning process is widely supported by new information and communication technologies and characterised by an inclusive methodological approach oriented towards the acquisition of key competences for active and participatory citizenship

## PROGRESS & NEXT STEPS

The project is in the later start-up phase. In the partnership meetings that have already taken place, the guidelines for the first output were presented and, in the context of branding and dissemination plan, a logo and the need for templates were discussed. The project is accompanied by a recurring quality evaluation to identify potential for improvement. In addition, the project's social media presence is being developed; there are accounts on Facebook and Instagram that the individual partners can fill with content in accordance with the dissemination plan. The project website is also under development.

On the current agenda are the preparatory courses for representatives of the individual project partners to gain fundamental knowledge for the design of the first output on the topic of "Education to Beauty Curriculum", which will be didactically designed by the participating partners in the next phase of the project and finally embedded in the online environment in order to reach the project participants. The first training, which deals with the IT environment of the Moodle platform to be used, has already been successfully completed. Two further training sessions will follow, one dealing with the ICAMS method and the other with video design. In addition, a coordinating brainstorming session is planned to harmonise the individual contributions of the project partners for the first output.
